

I CLAIM

1. Trunking running longitudinally in a first direction and comprising at least one substantially
5 U-shaped section that has a bottom and two lateral flanges, said trunking delimiting an interior volume designed to accommodate pipes or lines running longitudinally in the first direction, said trunking comprising rigid lengthwise wires running substantially
10 parallel to the first direction and rigid crosswise wires running substantially at right angles to the first direction, the crosswise wires being fixed to the lengthwise wires toward the interior volume of the trunking, and each crosswise wire comprising a base
15 portion belonging to the bottom of the trunking and two lateral branches belonging respectively to each lateral flange of the trunking,
wherein at least the lengthwise wires belonging to the bottom of the trunking each comprise a succession of
20 longitudinal portions connected by bends protruding away from the interior volume of the trunking, the bends of the lengthwise wires being designed to accommodate the base portions of the crosswise wires and being sized so that said base portions of the
25 crosswise wires and the longitudinal portions of the lengthwise wires lie at substantially the same level.

2. Trunking according to Claim 1, in which the longitudinal portions of the lengthwise wires are
30 straight and parallel to the first direction.

3. Trunking according to Claim 1, in which the base portions of the crosswise wires and the longitudinal portions of the lengthwise wires are arranged in
35 substantially the same plane.

4. Trunking according to claim 1, in which the bends of the lengthwise wires each have a width, measured in

the first direction, that substantially corresponds to the thickness of a crosswise wire.

5. Trunking according to claim 1, in which the bends
5 of the lengthwise wires each have a width, measured in the first direction, that is greater than twice the thickness of a crosswise wire.

6. Trunking according to Claim 5, in which the bends
10 in the lengthwise wires each have a flat bottom.
